

MonoBehaviour

```
graph BT; DialogEvent --> BaseEvent; BaseEvent --> MonoBehaviour
```

The diagram illustrates a class hierarchy with three classes arranged vertically. At the top is the 'MonoBehaviour' class, represented by a white box with a black border. Below it is the 'BaseEvent' class, represented by a gray box with a black border. At the bottom is the 'DialogEvent' class, represented by a white box with a black border. A blue arrow points from 'DialogEvent' up to 'BaseEvent', and another blue arrow points from 'BaseEvent' up to 'MonoBehaviour', indicating that 'DialogEvent' inherits from 'BaseEvent' and 'BaseEvent' inherits from 'MonoBehaviour'.

BaseEvent

DialogEvent
