

MonoBehaviour

```
graph BT; DialogEvent --> BaseEvent; BaseEvent --> MonoBehaviour
```

The diagram illustrates a class hierarchy with three classes arranged vertically. At the top is the 'MonoBehaviour' class, represented by a white box with a black border. Below it is the 'BaseEvent' class, also a white box with a black border. At the bottom is the 'DialogEvent' class, represented by a gray box with a black border. Two blue arrows point upwards, indicating inheritance: one from 'BaseEvent' to 'MonoBehaviour', and another from 'DialogEvent' to 'BaseEvent'.

BaseEvent
