

MonoBehaviour

```
graph BT; DialogEvent --> BaseEvent; BaseEvent --> MonoBehaviour
```

The diagram illustrates a class hierarchy with three classes arranged vertically. At the top is the 'MonoBehaviour' class, represented by a white box with a thin grey border. Below it is the 'BaseEvent' class, represented by a grey box with a thin grey border. At the bottom is the 'DialogEvent' class, represented by a white box with a thin grey border. A blue arrow points from the 'BaseEvent' box up to the 'MonoBehaviour' box, and another blue arrow points from the 'DialogEvent' box up to the 'BaseEvent' box, indicating that 'BaseEvent' inherits from 'MonoBehaviour' and 'DialogEvent' inherits from 'BaseEvent'.

BaseEvent
